Inverted letters – dependent t tests

	Efficacy	Latency	Precision
Canonical: left vs. right	$t(29) = 5.37$, $p < 0.001$, Hedges' $g = 1.28$	$t(29) = -2.06$, $p = 0.048$, Hedges' $g = -0.4$	$t(29) = 2.19$, $p = 0.037$, Hedges' $g = 0.62$
Inverted: left vs. right	$t(29) = 2.44$, $p = 0.021$, Hedges' $g = 0.51$	$t(29) = -1.96$, $p = 0.059$, Hedges' $g = -0.42$	$t(29) = -0.45$, $p = 0.658$, Hedges' $g = -0.11$
Interaction: difference between streams as a function of orientation	$t(29) = 3.02$, $p = 0.005$, Hedges' $g = 0.61$	$t(29) = 0.59$, $p = 0.562$, Hedges' $g = 0.1$	$t(29) = 1.28$, $p = 0.210$, Hedges' $g = 0.33$
